

### Laboratory Investigation Report

Patient Name	: Mr. Manan	Centre	: 688 - Shanti Mukand Hospital
Age/Gender	: 24 Y 8 M 14 D /M	OP/IP No	: OP/GE2101865
Max ID/Mobile	: 21001462/9910958063	Collection Date/Time	: 26/Feb/2022 04:45PM
Lab ID	: 0237042101291	Receiving Date	: 26/Feb/2022
Ref Doctor	: SELF	Reporting Date	: 27/Feb/2022
Passport No.	:		

#### Molecular Diagnostics

Test Name	Result	Unit	Bio Ref Interval
-----------	--------	------	------------------

#### COVID-19 (SARS CoV-2)Throat/Nasal Swab\*

Real Time PCR

COVID-19 (SARS CoV-2) Real Time PCR      Negative

#### Comment

Positive result does not necessarily indicate the presence of an active, viable virus as RTPCR only detects the presence of viral RNA (dead or alive).

In clinically suspected patients, a single negative test result does not exclude infection. Presence of inhibitors, mutations and insufficient RNA can influence the test results.

In case of clinical discrepancy with RTPCR test results, please feel free to contact us for further course of action.

Please correlate the test result with clinical and radiological findings.

#### CT Value Literature: -

1. There are no reliable studies to definitively prove a direct correlation between disease severity / infectiousness and CT values. Viral load does not have much role in patient management.
2. CT values differ from one kit to the other. Comparability of CT values among different kits is a challenge as different labs are using a mixed basket of kits with different CT cut-offs and different gene targets.
3. Samples from asymptomatic / mild cases show CT values similar to those who develop severe disease.
4. Patients in early symptomatic stage may show a high CT value which may subsequently change. In such cases, high Ct values will give a false sense of security.
5. Severity of COVID-19 disease largely depends on host factors besides the viral load. Some patients with low viral load may land up in very severe disease due to triggering of the immunological responses. Hence, again high CT value may give a false sense of security.
6. Negative result shows no CT value

ICMR Registration Number: MAXDL001

SRF No.:0708301335329

Kindly correlate with clinical findings

**Conditions of Reporting:** 1. The tests are carried out in the lab with the presumption that the specimen belongs to the patient name as identified in the bill/test request form. 2. The test results relate specifically to the sample received in the lab and are presumed to have been generated and transported per specific instructions given by the physicians/laboratory. 3. The reported results are for the information and interpretation by the referring doctor only. 4. Some tests are referred to other laboratories to provide a wider test menu to the customer. 5. Max Healthcare shall in no event be liable for accidental damages loss, or destruction of specimen which is not attributable to any direct and mala fide act or omission of Max Healthcare or its employees. Liability of Max Healthcare for deficiency of services, or other errors and omissions shall be limited to fee paid by the patient for the relevant laboratory services.
